Re: Gavin Central School  
Truss Inspection

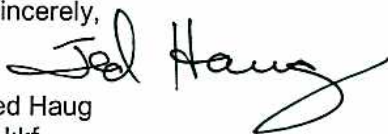

Dear Dr. Ahlemeyer,

I have had an opportunity to review your letter dated January 28, 2008 regarding a number of requests the Gavin School Board has made about our annual truss inspection at Gavin Central School. I have discussed these requests with Boller Construction and WJE, the structural engineer for the repairs. Below is an item by item response to the Board's concerns:

1. WJE made a full report of the past corrective work at the February 26 board meeting as requested.
2. Future inspections will be scheduled in advance as requested.
3. Legat Architects will perform the inspection on the designated day. WJE will be scheduled to be available to respond to any issues that may be discovered. The School District will hire an independent third party to be present during the inspection.
4. The inspection team will provide the inspection report in a timely manner based on the type of corrective work required, if any.
5. The School District can select a mutually agreed upon date to perform required repairs.
  - A. All trusses are visually inspected during each inspection. When the repairs were made on January 19, 2008, Jon Sfura of WJE also reviewed the trusses.
  - B. The number and related dates of the truss inspections were stated in the original settlement agreement between the School District, Boller Construction, and Legat Architects. This agreement can not be changed. All parties, however would like to accommodate the School District's request if possible. I would suggest that we schedule a meeting with representatives of the School Board to discuss this request further.

Please contact me at your convenience to further discuss item B.

Sincerely,

Ted Haug
